Hybrid SPC floors are a dramatic statement to any room, creating a look of modern elegance with a blend of uncompromising durability and core strength at a highly affordable price.

Practical and resilient, these luxury Stone Polymer Composite floors represent the newest evolution of vinyl flooring. They are highly dirt and bacteria resistant, require minimal maintenance and are easily cleaned, making it a smart option for families with children and pets.

Stonegrove Luxury hybrids combine the best of two worlds, with the durability and stability of stone composite and the embossed vinyl wear layer that is indistinguishable from real hardwood floors. They are extremely robust and forgiving floors that are water, scratch and stain resistant while also being warmer and more quiet underfoot compared to traditional ceramic tile, stone or slate floors. Our products come in a range of textures, finishes and colours, offering something for every taste.
